INVITATION LETTER

**FINAL Symposium COST NETWORK “NORM4Building”**

**Title: Use of by-products in construction: dealing with natural radioactivity,**

**Date & timing: Rome, Italy, 06 – 08<sup>th</sup> of June 2017**

Since January 2014 we have launched the **European COST network ‘NORM4Building’** ([www.norm4building.org](http://www.norm4building.org)) **for the use of by-products**, from industrial sectors that process naturally occurring radioactive materials (NORMs), in **newly developed construction materials**.

Our network that contains more than 120 experts from 30 European countries takes a **holistic approach** in developing new reuse pathways involving experts on different (technical, chemical, physical, ecological, economical, radiological,...) aspects of the materials. The COST Action also studies the impact of new European legislation such as the Euratom Basic Safety Standards on the newly developed reuse options.

On behalf of the organizing board of the COST project Norm4building, we would like to cordially invite you to the final symposium of our COST Action that is open for all interested parties and that aims to stimulate the close interaction between researchers, industry and regulators.

More information regarding the symposium, registration and abstract submission can be found at: [www.norm4building.org](http://www.norm4building.org)

Yours sincerely,

Wouter Schroyers  
(Chair of COST Network “NORM4Building”)

Cristina Nuccetelli  
(Local organizer)
